The Science of Reading — Short Course

Keeping the Science of Reading as our North Star, The Big Dippers—individually and collectively—are committed to bringing evidence-based practices to reading instruction in America’s schools. The following organizations are The Big Dippers.

The Barksdale Reading Institute

This Mississippi-based organization was established with the largest philanthropic commitment to a single state focused on early literacy that changed its trajectory for 4th grade reading. <https://www.msreads.org>

Hill Learning Center

A K-12 learning hub located in Durham, North Carolina, Hill provides an intensive remediation program for students with specific learning disabilities or attention deficit disorders and offers an expansive array of in-person and remote professional development opportunities for literacy practitioners. <https://www.hillcenter.org>

The Reading League

A mission-driven national education nonprofit based in New York and led by educators and reading experts, The Reading League promotes research-to-practice in order to reimagine the future of literacy education and accelerate the global movement toward reading instruction rooted in science. <https://www.thereadingleague.org>

The Right to Read Project

This progressive California-based organization founded and run by classroom teachers, researchers, and activists, the Right to Read Project is committed to the pursuit of equity through literacy. <https://www.righttoreadproject.com>

The Reading Teacher’s Top Ten Tools

Idaho-based national literacy trainer and author Dr. Deborah Glaser created this practical and in-depth online resource to make the unknown about reading instruction clear and give teachers confidence in bridging that knowledge to practice.

<https://readingteacherstoptentools.com>

"Feed your curiosity. Discover what the science of reading is all about and learn how new knowledge can impact your reading world through this accessible short course."

– Dr. Deborah Glaser
